

USER SCENARIO

Purchase Tickets User Scenario

StarLux Cinemas is a movie ticket booking system that enables the customer to browse through movies and book tickets to their preferred movie. The administrator will set and update ticket prices. The customer can specify the following parameters to purchase their tickets:

- Type of Ticket - Child, Adult, Senior
- Movie Experience - Regular, REAL-3D, Atmos, DBOX, IMAX, UltraAVX
- Number of Tickets - Must be equal to the number of seats previously selected

The following conditions must be met for the customer to successfully book their tickets:

- When selecting the amount of tickets, they can increment and decrement the value, however they cannot increment greater than the number of seats they previously selected.
- When clicking "Purchase Tickets", they must make sure the total number of tickets selected are not less than the number of seats selected in the seat selection page.

Once the tickets have been selected the customer can proceed to the payment section of the checkout page to complete their purchase.
